

Question from Sempra

The changes that are found on the Oasis are NOT the total network transmission rate, but only a portion of it correct?

The change on OASIS pertaining to the true up adjustment is the amount that will be added to the 2010 annual revenue requirement. It is not the total network transmission rate.

If so, do you know what the rates will be for starting January 2010 for both METC and ITC?

Rates starting in January 2010 will be posted on OASIS by September 1, 2009 for both ITC and METC.
