

METC 2009 True Up Adjustment
Question from Sempra

Q: The true up adjustment will be a \$6,289.807 credit to the METC 2011 Network Transmission Revenue Requirement, correct?

Will we see this dollar amount on line 6A of the Rate Formula Template for 2011?

Is the 2009 rate decrease \$1.0363/MW-Year ($\$6,289,807/6,069,083$ Kwh)?

A: Yes, the true up adjustment of \$6,289,807 will be a credit to the METC 2011 Network Transmission Revenue Requirement that will be posted on September 1, 2010. This amount will be shown on line 6A of the Rate Formula Template for 2011. Since the rate decrease occurs in 2011, there will not be a rate decrease for 2009; instead the amount of the true up will be reflected in the 2011 rates.
