

**CHANGES TO MANITOBA HYDRO STANDARDS OF CONDUCT
IN RESPONSE TO FERC ORDER 717**

Manitoba Hydro issued a new Standard of Conduct policy document on March 3, 2009. The new policy is based on FERC Order 717.

The Implementation Procedures were approved June 22, 2009.

The Implementation Procedures states that Manitoba Hydro will be developing a page on its corporate website, www.hydro.mb.ca. This page has been developed and will be available to all by July 17, 2009. Over the next three to six months the page will become fully developed to contain all the information required by the Manitoba Hydro Standards of Conduct Policy Document. While this conversion is being made, the information found on the MHEB OASIS page will be updated to contain the Policy Document, the Implementation Procedures, and any required postings. Once the new site is completely operational, the information will be removed from this site and a link to the new site will be placed on the MHEB OASIS page.

If you have any questions or concerns, please contact Allan Silk, P.Eng., Chief Compliance Officer for the Manitoba Hydro Standards of Conduct Program, at 204-487-5470.
