

Notice of Tariff Revision for the Manitoba Hydro Open Access Interconnection Tariff – December 1, 2010

On December 1st 2010, Manitoba Hydro will be modifying its Open Access Interconnection Tariff. A summary of the changes are listed below. For more details contact Jo-Anne Ross at jross@hydro.mb.ca

- The Engineering and Procurement Agreement will be deleted.
- A revision will be made to carve out small generators which are primarily used to provide back-up generation for mines or other industrial processes.
- A revision will be made to delete requirement of \$20,000.00 deposit (rather than \$10,000.00) for a Generator that does not provide evidence of site control
- Revised description of payment for studies conducted under the OAIT to make consistent with the study agreements
- Contractors will be added to the list of parties that can receive Confidential Information.
- Changes to clarify when interest will be paid and make interest payment consistent with the OATT.
- All sections referring to expedited procedures will be deleted
- A change will be made requiring all notices to be made by courier or registered mail.
- A clarification is being made to state that System Protection Facilities are those associated with the Generator Interconnection Facilities
- A change will be made to agency termination in the Resource Solicitation Process.
